

Colour chart for the BlackBerry 8900 series.

This is our standard range of coloured replacement housings, available in a high gloss finish for the edge and the battery cover.

Custom colours and finishes are also available. Please contact us for further information and pricing options.

We provide the option to replace the front and back casing or just the battery cover. All these are fully interchangeable, which allows for any combination of colours for a truly personalised BlackBerry.

Ask about our range of high quality skins. Available in a number of eye catching designs. Or if you require a fully custom design or logo we can also create this for you.
