Condeco Modulex iSign – elegant digital signage for meeting rooms

Condeco's unique interactive technology combined with all the style of a sleek Modulex room sign.

The Condeco Modulex iSign uses the latest screen technology to provide vital meeting information and functionality from right outside the meeting room. The 10" glass LCD panel displays the meeting title, the host's name, the start time and duration of the meeting – all in real time, which eliminates meeting conflicts and maximises utilisation.

The screen has been developed in co-operation with leading designers to reflect the latest trends in architectural design, resulting in a sleek and elegant appearance which will suit any office environment.

On arrival, users confirm the room bookings through the interactive menu buttons on the screen. If the meeting is not started within a preset period, the meeting is cancelled and the room made available for other users.

The screen helps to avoid meeting 'no shows' and provides users with the ability to utilise available meeting rooms by making instant bookings from directly outside the room via user-friendly menu buttons.

The interactive functionality also enables the award-winning room booking features of Condeco to be accessed by the meeting host from the screen. Any changes and updates made from the screen are synchronised in real time ensuring that the rooms are not double booked and availability is instantly updated.

Key Functionality

- Displays detailed meeting information directly outside the room
- Lists future meetings reserved for later in the day
- Auto releases the room if no-one shows up
- Meetings can be extended up to the next scheduled booking
- Users can end the meeting directly from the screens releasing any unused time
- Instant meetings can be booked directly from the screen
- Stylish design for sleek environment
- Glass-mounted fascia
- Full reporting of bookings, no shows and room usage
